The **Software Engineering Realsearch Group** is committed to sound empirical software engineering research. Our areas of expertise are reliability, testing, security, and process improvement. Working closely with our industry partners, we conduct our research with the goal of improving the software development process and software quality.

The **Privacy Place** is committed to disseminating information in the form of research results and relevant technical privacy developments in an effort to aid policy makers, software developers and public citizens. The Privacy Place is staffed by an inter-disciplinary team of researchers at North Carolina State University's Computer Science and Business Management departments; as well as the Georgia Tech College of Computing, the Purdue University Computer Science Department and the University of Lugano Communication Sciences department.
