Scientific visualization and computer graphics research is conducted in the Knowledge Discovery Laboratory (KDL) as part of a joint collaboration with human-computer interaction, data mining, and artificial intelligence. Dr. Jon Doyle, Dr. Dennis Bahler, Dr. Robert St. Amant, and associated students and research colleagues are also directing projects as part of KDL. Hardware resources include Sun Ultras and Sun Blades, SGI O2s, Dell Windows and Linux PCs, and RAID storage arrays by Dell and Network Appliance.
