

VISUAL EXPERIENCE LAB

00110001001110010011011000110111

The Visual Experience Lab is a research group in NC State's Computer Science Department. We meet regularly and welcome any visitor.

The VX Lab at NC State studies how visual technologies affect human emotion, thinking and behavior. We are interested in visual technologies that move us: how digitally created imagery affects human emotion, thinking and behavior. Our work spans computer graphics, human-computer interfaces, visualization, psychology and design.

Faculty

Dr. Ben Watson
